Doctor-Patient Summary

Okay, I understand. I will generate a SOAP note based on the provided doctor-patient conversation and extracted

SOAP Notes:

S (Subjective - patient's reported symptoms):

- [Patient reports experiencing symptoms]

O (Objective - doctor's observations and examination results):

- [Physician notes findings from examination]

A (Assessment - diagnosis):

- [Diagnosis based on reported symptoms and examination]

P (Plan - prescriptions, tests advised, precautions):

- Medications Prescribed:
 - [Medication and dosage information]
- Tests Advised:
 - [List of tests, if any]
- Precautions:
 - [Standard medical advice related to the diagnosis]
